I wish to express my opinion on NAB's Petition 04-160. Since I travel on the highway quite often, XM radio provides me with the opportunity to enjoy the type of music that I want to listen to without having to constantly scan local channels as I move from one area to the next. It is also helpful to be able to access traffic and weather information on stations that I know about without having to try to find the local channel with the necessary information. This important information is available to me whenever and wherever I need it. Please reject NAB's petition 04-160. Thank you.
